

AN INTRODUCTION

Here Comes The Future...

Welcome,

Over the course of my 35 years in the building supply industry I have observed a gap in the availability of store planning services for the non-bannered, independent, and smaller format stores.

Retail Planning Services provides an economical option for business planning services and management to deliver solutions that will result in increased sales and profits.

We can provide planning services from a modest project using your existing fixtures, through larger, requiring new or used fixtures, by supplying a fixture list for quotes from a variety of sources and brands.

Here Comes The Future...

such as, interior store, warehouse and yard, and traffic flow design and layout, using current design software, Softplan 2014, we work closely with store owners

Here Comes The Future...
